DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-15, drawn to methods for producing articles that are partially or completely comprised of fibre-reinforced plastics material.

Group 2, claim(s) 16-18, drawn to a method for producing a multi-layer composite.

Group 3, claim(s) 19-20, drawn to a method for producing a fiber-reinforced plastics material article.

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reason: The methods claimed in Groups 2, 3 lack the special technical feature in Group 1.

Group 1 describes methods of forming fibre-reinforced plastics materials by using a specific reactive starting material (containing cyclic or macrocyclic oligomers of polyester) that polymerizes into a plastics material matrix.

Group 2 describes a method of using a plastics material matrix to form a multi-layer composite. Nowhere is it described in Group 2 that the specific reactive starting material (containing cyclic or macrocyclic oligomers of polyester) that is disclosed in Group 1 is used to form the multi-layer composite.

Group 3 describes a method of using a plastics material matrix to form a fibre-reinforced plastics material article. Nowhere is it described in Group 3 that the specific reactive starting material (containing cyclic or macrocyclic oligomers of polyester) that is disclosed in Group 1 is used to form the fibre-reinforced plastics material article.

2. A telephone call was made to Bachman & LaPointe, P.C. on 1/13/09 to request an oral election to the above restriction requirement, but did not result in an election being made due to the policy of Bachman & Lapointe, P.C., to submit the restriction in writing only.

. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 4122

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
